

During my time in the Washington Center program, I would like to intern with a museum or historical site in the DC area. After graduate study I would like to become a curator, or work in a related area of the historical field. I would prefer to specialize in Greco-Roman culture, early Medieval Europe, or Europe and America's cultures from 1760-1815. During my internship I would like to be involved in curatorial work, exhibition design, or museum education. I want to better understand the work that goes into the preservation, cataloguing and display of antiquities, art, and other historical artifacts.
